Introducing the Online Range

We're excited to introduce our Online Range of hot tubs and swim spas, created exclusively for you.

This exciting collection gives you the flexibility to **rename and rebrand** the models, so they align seamlessly with your business identity and make a strong impact in your showroom.

With **9 hot tubs** and **2 swim spas** to choose from, the Online Range combines **outstanding quality, unbeatable value, and affordable pricing**—helping you offer your customers the very best, while strengthening your own brand presence.

Discover the perfect balance of style, performance, and affordability—only with the Superior Wellness Online Range.

Bespoke marketing to accelerate your sales.

To support your sales, we also offer customised marketing materials including brochures, spec sheets, and wall banners. Simply send us your logo and chosen model names, and we'll personalise everything for you—making it easier than ever to showcase your products and sell more.

Please see below some great examples of how we have created marketing POS for the Wellness Co showroom with their Relax range.

The Wellness Co.

Take full control with the Online Range. All products come with a built in Gecko (Hot Tub) or Balboa (Swim Spa) control system; global recognised brands known for their quality and innovation. The Gecko control system enables users to customise their hot tub experience with LED underwater changing lights, designed to suit a range of moods.

Gecko 300 (Single Pump)

Gecko k500 (Double Pump)

Balboa SpaTouch2 (Swim Spa)

Bluetooth connectivity

The majority of products within this range come as standard with a Bluetooth amplifier and two built in pop-up speakers.

Simply connect your device with a click of button and play your favourite music, podcast or radio station via the built-in amplifier.

Sit back, relax and enjoy!

The jets on this range have been designed to offer your very own personal masseuse waiting to work those aches and pains away.

Neck & shoulder jets

The built-in luxury hydrotherapy neck and shoulder massage jets are fantastic at relieving tension and muscle tightness.

These features are perfect for customers who suffer with neck pain, shoulder pains and headaches. The warm water combined with the jets is proven to relax muscles helping you to unwind and relax in style.

Leg & thigh jets

The hydrotherapy leg and calf jets will help to soothe and relax tired and aching muscles.

These jets are perfect for people who are active including cyclists and runners. Calf jets can also help with joint mobilisation, muscle strengthening, maintenance, restoration and improved circulation.

Chromatherapy

Lighting is another incredibly important feature for the Online Range. Lighting isn't just for safety or fun; it is also a science in its use.

Chromatherapy (also referred to as colour therapy) is a complimentary medicine technique and is the reason many small LED lights are added to the design of each hot tub.

Colours can bring about emotional reactions in the body by stimulating the optic nerve as well as nerves all over the body. Chromatherapy is often used in conjunction with hydrotherapy to heighten the effect.

The range has been specifically designed with Chromatherapy in mind – enjoy the soothing relaxation of the jets combined with the various colour changing effects.

Air source heat pump

Air source heat pumps are an energy-efficient and economical way of heating your hot tub or swim spa. They can be used all year round giving great savings on energy bills.

They have already proved to be beneficial for heating homes, commercial spaces or swimming pools and now they have become increasingly popular for hot tubs.

Heat pumps make use of significantly less energy when compared to natural gas. Although the time taken to heat the water might be the same as their electric or gas-powered counterparts, the process is much more efficient and economical.

How does a heat pump work?

Heat pumps heat up the water by extracting natural heat from the outside air. The heat pump fan draws in the air and directs it over the evaporator coil which contains an advanced liquid refrigerant. The air turns into a gas which is then compressed to increase the heat. This hot gas passes through the heat exchanger which transfers the heat from the hot gas to water and heats it up.

Here are some of the benefits of heat pumps:

- Savings on hot tub heating bills
- Has the potential to heat up to temperature faster for a quick turnaround
- Works all year round and down to -15 degrees external temperature
- Self-regulating and timer controlled

Specification of the Air Source Heat Pump

Model - Mr Silence	MS70	MS90	MS110
Performance Conditions: Air 27°C/ Water 27°C/ Humid. 80%			
Heating Capacity (kW)	6.8	9.0	11.0
COP Range	14.0~7.1	14.0~7.1	14.0~6.9
Average COP at 50% Speed	10.4	10.4	10.2
Performance Conditions: Air 15°C/ Water 26°C/ Humid. 70%			
Heating Capacity (kW)	4.9	6.5	7.5
COP Range	7.2~4.4	7.3~4.7	7.3~4.6
Average COP at 50% Speed	6.4	6.4	6.5

Model - AquaIntel	SW50	SW70
Performance Conditions: Air 27°C/ Water 27°C/ Humid. 80%		
Heating Capacity (kW)	5.0	6.9
COP Range	13.0~6.0	13.0~6.2
Average COP at 50% Speed	9.1	9.0
Performance Conditions: Air 15°C/ Water 26°C/ Humid. 70%		
Heating Capacity (kW)	3.5	5.0
COP Range	6.8~4.5	6.7~4.5
Average COP at 50% Speed	6.2	6.3
