

in.temp

A new way to regulate the water of your spa

Plug and play solution

Here comes Gecko's new heat pump solution. Using our in.temp has never been so easy! Simply connect it to a Y series control that supports it and you're good to go! Automatic detection, smart power management and no additional power circuit required, the in.temp powers directly from the spa control.

Benefit from energy savings

Are you looking for the most energy efficient form of heating water? Our in.temp is the perfect solution! Air sourced heat pumps, will allow you to save up to 75% energy consumption in comparison with electric elements. The icing on the cake: Gecko's in.temp also uses an eco-friendly refrigerant (R32 and R410A).

A total flexibility that can also cool down water

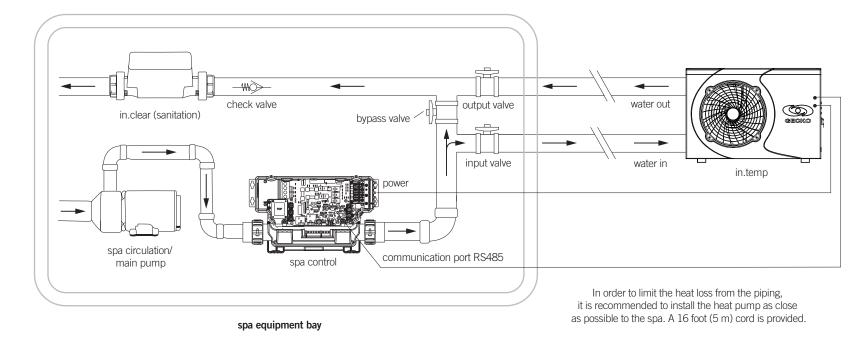

With in.temp, you can choose one of its six modes of operation that suits you the best: Eco Heat, Smart Heat, Eco Auto, Smart Auto, Cool and Electric! No matter the weather, your spa will always be at the perfect temperature. Smart modes let you taking full advantage of your in.temp to optimize your savings.

in.temp

World-class, quiet and efficient.

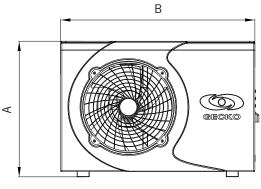

in.temp installation

 ¹ Wires gauge and breaker size should be dimensioned according to the maximum current rating.
² Based on the following operating conditions: 24°C (75°F) Ambient air, 26°C (79°F) Water inlet.
³ Based on the following operating conditions: 15°C (59°F) Ambient air, 26°C (79°F) Water inlet. ⁴ Based on the following operating conditions: 35°C (95°F) Ambient air, 29°C (84°F) Water inlet.

* North American

compatibility

in.temp works with the following systems from Gecko's Y series

Wide selection of keypads (auto-detected by the system upon connection)

in.k330 color LCD display, 5 keys

in.k500 color LCD display, 7 keys

in.k800 color LCD display, 10 keys

in.k1001+ color LCD capacitive touchscreen display

in.k1000+ color LCD capacitive touchscreen display
