SKIN: Causes severe irritation which will progress to chemical burns.

INGESTION: May cause burns or irritation of the linings of the mouth, throat, and gastrointestinal tract.

INHALATION: Irritation of the respiratory tract and the other mucous membranes. May be corrosive to the respiratory tract. Dust may be harmful or cause irritation.

5. FIRE FIGHTING MEASURES

EXTINGUISHING MEDIA: Use extinguishing media appropriate for surrounding fire. Do not use a heavy water stream. Use of heavy stream may spread fire.

HAZARDOUS COMBUSTION PRODUCTS: Sulfur oxides. Smoke. Oxides of silicon and carbon. Sodium oxides.

EXPLOSION HAZARDS: Contact with metallic substances may release flammable hydrogen gas. Dust explosion hazard in air. Exothermic reaction with water.

FIRE FIGHTING PROCEDURES: Use water spray or fog for cooling exposed containers.

FIRE FIGHTING EQUIPMENT: As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear.

exothermically with water releasing heat. Adding an acid to a base or base to an acid may cause a violent reaction. Contact with water liberates toxic gas.

6. ACCIDENTAL RELEASE MEASURES

SMALL SPILL: Clean up spills immediately and dispose of waste safely. Do not use water for cleaning. Absorb spillage to prevent material damage. Use explosion proof vacuum during clean-up, with appropriate filter. Do not mix with other materials. Vacuum clean-up is preferred. If sweeping is required use a dust suppressant. Use only non-sparking tools. Contact competent authorities after a spill.

LARGE SPILL: Contain solid spills with appropriate barriers and prevent migration and entry into sewers or streams. As an immediate precautionary measure, isolate spill or leak area in all directions. Avoid generation of dust during clean-up of spills.

ENVIRONMENTAL PRECAUTIONS

WATER SPILL: Avoid runoff to waterways and sewers.

GENERAL PROCEDURES: Do not breathe dust. Do not get in eyes, on skin or on clothing. Avoid generating dust. Remove ignition sources. Keep away from heat, hot surfaces, sparks, open flames, and other ignition sources. No smoking.

7. HANDLING AND STORAGE

GENERAL PROCEDURES: May be corrosive to metals. May release corrosive vapors. Accumulation and dispersion of dust with an ignition source can cause a combustible dust explosion. Keep dust levels to a minimum and follow applicable regulations. Do not mix with acids. Contact with acids liberates toxic gas. Comply with applicable regulations. Avoid creating or spreading dust. Use explosion-proof electrical, ventilating, and lighting equipment. Proper grounding procedures to avoid static electricity should be followed.

HANDLING: Handle in accordance with good industrial hygiene and safety procedures. Avoid creating or spreading dust. Do not breathe dust. Do not get in eyes, on skin or on clothing. Wash hands and other exposed areas with mild soap and water before eating, drinking or smoking and when leaving work. Keep away from heat, sparks, open flames, and hot surfaces. No smoking. Handle empty containers with care because they may still present a hazard.

STORAGE: Keep container closed when not in use. Store in a dry, cool place. Keep/Store away from direct sunlight, extremely high or low temperatures and incompatible materials. Store locked up/in a secure area. Store in original container or corrosive resistant and/or lined container. Store in corrosive resistant container with a resistant inner liner. Incompatible Materials include: Strong acids, strong bases, and strong oxidizers. Metals. May be corrosive to metals. Moisture. Water.

ENGINEERING CONTROLS: Ensure adequate ventilation, especially in confined areas. Ensure all national/local regulations are observed.

Emergency eye wash fountains and safety showers should be available in the immediate vicinity of any potential exposure. Proper grounding procedures to avoid static electricity should be followed. Use explosion-proof equipment. Use local exhaust or general dilution ventilation or other suppression methods to maintain dust levels below exposure limits. Power equipment should be equipped with proper dust collection devices. It is recommended that all dust control equipment such as local exhaust ventilation and material transport systems involved in handling of this product contain explosion relief vents or an explosion suppression system or an oxygen-deficient environment.

PERSONAL PROTECTIVE EQUIPMENT

SKIN: Wear suitable protective clothing to minimize skin contact.

RESPIRATORY: If dusting occurs, wear a NIOSH approved respirator.

PROTECTIVE CLOTHING: Chemically resistant materials and fabrics. Corrosion-proof clothing.

WORK HYGIENIC PRACTICES: If exposure limits are exceeded or irritation is experienced, approved respiratory protection should be worn. In case of inadequate ventilation, oxygen deficient atmosphere, or where exposure levels are not known wear approved respiratory protection.

COMMENTS:

For substances listed in section 3 that are not listed here, there are no established exposure limits from the manufacturer, supplier, importer, or the appropriate advisory agency including: ACGIH (TLV), AIHA (WEEL), NIOSH (REL), or OSHA (PEL).
